LAB ASSIGNMENT 6

Q1- Take an integer from user and generate a random int array with the size of n, and random elements in the range of [0-n). Then, find the frequency of all elements.

Q2- We have two arrays holds the names and IDs of students in same order. Sort name array with respect to IDs. Here is an example:

    idArray = {100315086, 100315002, 100315079}

    nameArray = {"ali", "ayşe", "zeki"}

After sorting,

    nameArray = {"ayşe", "zeki", "ali"}
